We can read many meanings into the myth of Pandora's Box including curiosity being a curse when it releases "evils" and unexpected troubles. Do we dare open the box and unleash the challenging reality of what's happening in the room? What happens if we decide to keep the lid on it?

Join me for this interactive webinar where we will explore the complex role of power and influence in our facilitated events. We will look at:

- recognising behaviours and group dynamics related to power within our facilitated groups
- deciding if, when and how we "open the lid"
- managing difficult situations
- understanding our own power and influence
